## ABSTRACT

*Library management system is a project which aims in developing a computerized system to maintain all the daily work of library. It also has a facility of admin login through which the admin can monitor the whole system. It has a facility where student after logging in their accounts can see list of books issued and its issue date and return date. This system will store all the books and members information that consist book numbers, book titles, author names and racks to the system database. It also provides search function to help students find the book by number of book.*

*Overall this project is being developed to help the students as well as staff of library to maintain the library in the best way possible and also reduce the human efforts.*

# Table of Contents

## Introduction
